

# HC-KFS23B Mitsubishi AC Servo Motor

|                      |                                                      |
|----------------------|------------------------------------------------------|
| Model                | HC-KFS23B                                            |
| Brand                | original                                             |
| Category             | <a href="#">AC Servo Drive</a>                       |
| Motor Type           | Low-inertia, Small-capacity Servo Motor              |
| Rated Output         | 0.2 kW                                               |
| Rated Speed          | 3000 r/min                                           |
| Brake                | Equipped                                             |
| Shaft                | Standard (Straight Shaft)                            |
| Protection Class     | IP55 (excluding shaft through portion and connector) |
| Encoder Resolution   | 131072 pulses/rev (17-bit)                           |
| Compatible Amplifier | MR-JE-10B / MR-JE-10A                                |
| Control Modes        | Position, Speed, and Torque Control                  |
| Key Feature          | Low-inertia design for high-frequency operation      |

Note:

Invshop recommends that you inquire with the original factory or its agents about the latest production status and technical information about HC-KFS23B. The product parameters displayed on Invshop are entered by Invshop engineers according to the specifications, and efforts have been made to minimize errors, but we cannot guarantee the complete correctness of the parameters. Please refer to the specification sheet!
