KL1501 Module Genuine Use BECKHOFF

Model	KL1501
Brand	BECKHOFF
Category	[BECKHOFF](#)
Model	BECKHOFF KL1501
Type	EtherCAT Terminal (Digital Output Module)
Channel Count	16 channels
Output Voltage	24 VDC (per channel)
Condition	Genuine used / Pulled from working system
Connection Technology	2-wire connection
Compatibility	BECKHOFF EtherCAT system, TwinCAT software
Status Indication	LEDs for each channel and module status
Primary Use	Controlling actuators, valves, relays in automation
Note	Pre-owned, functionality should be verified upon receipt

Note:

Invshop recommends that you inquire with the original factory or its agents about the latest production status and technical information about KL1501. The product parameters displayed on Invshop are entered by Invshop engineers according to the specifications, and efforts have been made to minimize errors, but we cannot guarantee the complete correctness of the parameters. Please refer to the specification sheet!
