

SGDM-10DN Yaskawa servo drive

Model	SGDM-10DN
Brand	Yaskawa
Category	AC Servo Drive
Model Number	SGDM-10DN
Product Type	Servo Drive / Servo Amplifier
Input Power	AC 200 - 230V, 50/60Hz
Control Modes	Position, Speed, and Torque control
Feedback System	Likely supports high-resolution serial encoders (e.g., 20-bit)
Communication Interface	May support fieldbus options like EtherCAT or Profibus
Protection Functions	Overcurrent, Overvoltage, Undervoltage, Overload, Overheating
Operating Temperature	Typical for industrial electronics
Mounting Style	Base plate mounting
Safety Standards	Complies with international standards
Typical Applications	Machine tools, robots, automated production lines

Note:

Invshop recommends that you inquire with the original factory or its agents about the latest production status and technical information about SGDM-10DN. The product parameters displayed on Invshop are entered by Invshop engineers according to the specifications, and efforts have been made to minimize errors, but we cannot guarantee the complete correctness of the parameters. Please refer to the specification sheet!
